PRELIMINARY ABSTRACT OF RAILWAY STATISTICS FOR THE YEAR ENDED DECEMBER 31, 1953

INTRODUCTORY STATEMENT

This preliminary abstract for the calendar year 1953 is the forty-third in the series and is compiled from the annual reports of class I line-haul railways, class I switching and terminal companies, the Railway Express Agency, Inc., and The Pullman Company. It is intended primarily to make available as promptly as possible certain totals not obtainable from the monthly or quarterly reports of carriers. The totals are subject to change after corrections in the annual reports have been authorized. This final totals will appear in the Statistics of Railways for 1953.

Because a separate annual publication of freight commodity statistics is regularly issued in detail for the individual classes of commodities, only group totals of commodities carried are shown in this preliminary abstract for the year 1953.

It should be especially observed that the balance sheet items shown on page 5, Summary No. 1, relate to companies that file operating reports and do not cover the balance sheets of companies that file lessor reports, the property of which is operated by class I line-haul steam railways; that is, railways having annual operating revenues above \$1,000,000. Table 1 below, however, shows the investment in road and equipment of the operating, lessor, and proprietary companies at the end of the year 1953, in comparison with final figures for the preceding year. At the close of 1953 these companies, which include all classes of line-haul railways, had a total investment in road and equipment of \$32,416,389,089, which was \$594,275,068 more than the total for 1952. This comparison is without consideration of the increase in the accrued depreciation. At the close of the year 1953 accrued depreciation and amortization of defense projects of class I, II, and III line-haul companies and their lessors and proprietary companies amounted

to \$7,009,758,378, an increase of \$83,951,125 over the 1952 total. Operating expense accounts covering amortization of defense projects were cancelled effective January 1, 1952. (See Commission's report in Docket No. 30920—Amortization Accounting for Emergency Carrier Facilities, decided December 21, 1951, and order of same date.) Table 2 shows by class of railway the investment in road and equipment less recorded depreciation and amortization as of December 31, 1953.

The increase in the investment in road and equipment of class I operating companies shown in Table 1 is \$1,524,198,940. An increase of \$616,685,862 is shown on page 5, Summary No. 1, as being the net expenditures for additions, betterments, and extensions, after retirements for class I operating companies. The difference between these amounts is explained by the fact that the changes in the investment accounts reported by the carriers reflect not only the net expenditures for property during the year but also include changes due to reorganization and other accounting adjustments.

In Summaries 1 and 3, the assignment of revenues to freight service and to passenger and allied services is in accordance with the distributions made by carriers in filling out the schedule relating to revenues in the annual report form. The division of expenses between freight service and passenger and allied services is as reported by carriers under rules prescribed by the Interstate Commerce Commission.

Table 3 shows for class I line-haul steam railways, the total revenues, expenses, net revenues before taxes and rents, the operating ratio, and the net railway operating income for the freight and passenger service separately, for the years 1943 to 1953. Small amounts of revenues and expenses reported as "Not related to either freight service or passenger and allied services" are shown in the last two columns.

NOTE.-- No net income accrues to Railway Express Agency, Incorporated, and no dividends are paid or payable on the capital stock of the Agency.

The capital stock of Railway Express Agency, Incorporated, is owned by 68 Class I railroads. There are in effect between the agency and each of approximately 260 carriers, including the 68 stockholding railroads, agreements in standard form which designate Railway Express Agency as the exclusive agent of each such carrier for the conduct of express operations over its lines.

These agreements provide that there shall be ascertained the income, viz:

1. Charges for transportation,
2. Revenue from operations other than transportation,
3. Other income credits,
4. Profit and loss credits;

that from the total thereof shall be deducted:

1. Operating expenses,
2. Taxes,
3. Other deductions from income including compensation to carriers not parties to the standard form of agreement,
4. Profit and loss debits;

and that the remainder shall be apportioned among and paid to the carriers, parties to the standard form of agreement, according to the volume of express business handled on the respective lines as measured by gross express revenues. These payments, as well as those made to carriers not parties to the standard form of agreement, are classified as "Express privileges--Dr."

Following is a condensed statement of income and profit and loss, before deduction for "Express privileges--Dr.," for the years 1951, 1952, and 1953.
